"EVEN THIS WILL PASS AWAY."

Of all the proverbs quaint and sweet,
That burdened souls so often greet,
As some wise voice from ancient clay,
There sure is none in whose belief
The worn heart finds such sweet relief,
As "Even this will pass away!"

When weary hands from early dawn
Till lengthening eve must labor on,
And know not succor day by day;
How gladly comes the sweet refrain,
That echoes o'er and o'er again,
"This, even this, will pass away."

When "dear" that are hard to bear
Would sink the soul in black despair,
And whitening, eyes refuse to pray;
Faith's lovely face is then to glow,
And sweet her "Even this will pass away."
"But even this will pass away."

When earth to earth and dust to dust
Is read above our heart's best trust,
And we in anguish turn away;
The bitter cup less bitter seems,
When through its dregs the bright truth gleams,
That even this will pass away.

Yea, even this! With hearts bowed down
We stand beside the new made mound,
And long to greet the coming day,
When weary feet have found a rest;
When hands are folded o'er the breast;
And all life's woes have passed away.
—Margaret McKee Lackey in New Orleans Pic-
nune.

Electric Power from Coal.
The direct conversion of heat into elec-
tric work is a problem that continues to
tax the ingenuity of the electricians.
What seems to be the most promising at-
tempt at solution yet made is a new
thermo-magnetic generator and motor
devised by M. Menges, of The Hague.
Like the recent pyro-magnetic dynamo
of Edison, it depends on the fact that the
magnetic metals lose their magnetic
power when heated. It claims several
important advantages, however, the chief
being that the necessary alterations of
heating and cooling are given automatic-
ally, and that the cores of the armature
coils are relieved from changes of tem-
perature.—Arkansas Traveler.

Signaling at Sea.
Rear Admiral Colomb, writing in allu-
sion to a recent disastrous collision in the
channel, calls attention to the present
very defective methods of signaling at
sea, and points out how impossible it
often is for one ship to ascertain the in-
tentions of another. He mentions one
thing, which is not generally known—
namely, that the board of trade forbids
the mercantile marine to use that system
of speech by signal which has been for a
long time common to every navy in the
world. He also pleads for some signal
which will not only attract attention to
"distress," but will also indicate to some
extent the nature of that distress.—
Chambers' Journal.

An Englishman's Advice.
"I notice," said his lordship, "that
you have an extraordinary number of
people in America with bad teeth and
poor eyes, and I read that there are
more dentists and oculists in the United
States than in all the rest of the world.
You drink iced water with hot food, and
this spoils your teeth. You strain your
sight by reading fine print at the wrong
time, and that ruins your eyes. Avoid
such habits, take care of your eyes and
teeth, and half of your dentists and
oculists will soon be able to join the
pioneers of Dakota in stopping these
plizzards." And his lordship took a
pinch of snuff.—New York Sun.

Growth of the Finger Nails.
The growth of the nails is more rapid
in children than in adults, and slowest
in the aged. It goes on more rapidly in
summer than in winter, so that the same
nail that is renewed in 132 days in win-
ter, requires only 116 in summer. The
increase for the nails of the right hand is
more rapid than the left; it also differs
for the different fingers, and in order,
corresponding with the length of the
finger. It is most rapid for the middle
finger; nearly equal for the two either
side of this; slower for the little finger,
and slowest for the thumb.—New York
Commercial Advertiser.

Streets of St. Petersburg.
The streets of St. Petersburg are wider
than those of any city in the world.
More than one-third of the area is in the
streets, and most of them are 200 feet
between the building lines. Endless
almost are the open spaces and squares,
treeless and unturfed, surrounded by
houses gauged upon the same scale as
the streets. In one place you can walk
half an hour and pass only three palaces,
and it is common for a single residence,
or palace to occupy the whole front of a
long block.—William Elery Curtis in
Chicago News.

Making Over Muskrats' Fur.
A Maine fur dealer says that it is as-
tonishing the uses to which muskrats'
fur are put. The skins are taken at the
city establishments, clipped, colored and
put into such shape that they very closely
resemble otter, and, if not sold for that,
are at least represented to be much bet-
ter than they really are. The fur is
never sold for what it really is, but is
fixed up to look like something finer and
charged for accordingly.—Chicago Her-
ald.

The Quality of Meat.
Professors Henry and Sanborn have
both shown that the quality of pork may
be greatly changed and improved by
judicious and intelligent feeding. With-
out doubt beef and mutton may be im-
proved in like manner by like feeding.—
Boston Budget.
